"Bicentennial Year of the Consolidation of our Independence and the Commemoration of the Heroic Battles of Junín and Ayacucho"

OFFICE No. 227

-GRA-ICA-ESSALUD-2024

November 20, 2024

Ica,

Doctor

ALBERTO MARTORELL CARREÑO

Director

Decentralized Directorate of Culture of Ica

Ministry of Culture

Av. Ayabaca s/n

CITY. -

SUBJECT : INFORMATION ON THE IMAGES OF THE MUMMIES IN POSSESSION OF THE SAN LUIS
GONZAGA NATIONAL UNIVERSITY OF ICA.

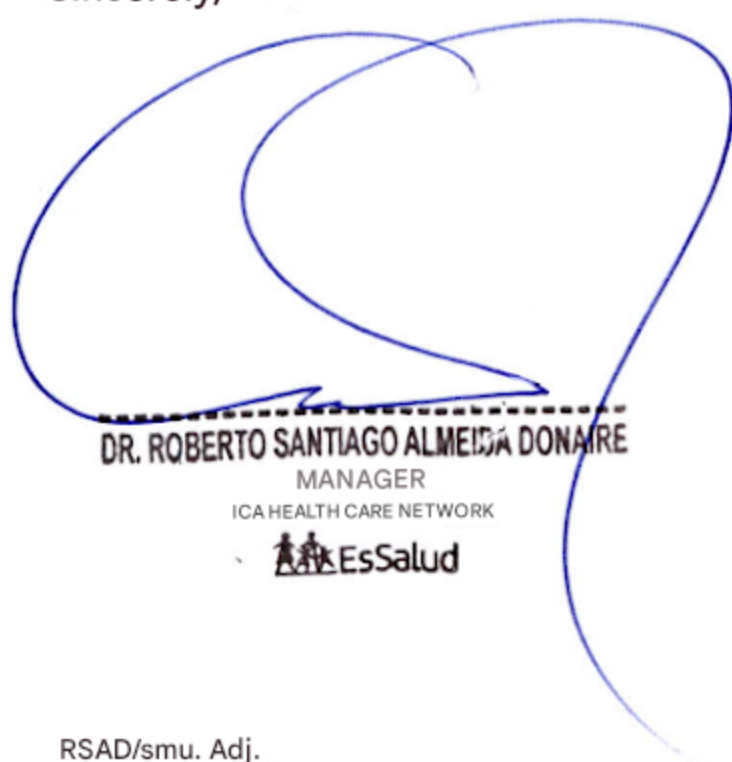

REFERENCE: a) NOTE No. 1929-DHIV-AHM-GRA-ICA-ESSALUD-2024
: b) OFFICE No. 2473-2024-DDC-ICA/MC
: c) OFFICE No. 2620-2024-DDC-ICA/MC

It is with great pleasure that I address you to cordially greet you and to insist on what was requested through the referenced Offices, in attention to the report of the images taken on 09/13/2024 of the mummies (María and Wawito) in possession of the San Luis Gonzaga National University of Ica

In this regard, I hereby inform you of the attached document, Note No. 1929-D-HIV-AHM-GRA-ICA-ESSALUD-2024, issued by the director of Hospital IV "Augusto Hernandez Mendoza" of the Ica Healthcare Network - EsSalud, who states that the report was prepared by the head of the Diagnostic Imaging Service.

Take this opportunity to express my highest consideration.

Sincerely,

DR. ROBERTO SANTIAGO ALMEIDA DONAIRE
MANAGER
ICA HEALTH CARE NETWORK
EsSalud

Ica, November 19, 2024

OFFICE No. 002620-2024-DDC ICA/MC

Sir:

Dr. ROBERTO SANTIAGO ALMEIDA DONAIRE
Ica Healthcare Network Manager.

Present.-

Subject: Third reiterated request for referral of the medical report and the
tomography and X-ray images of the mummies in the possession
of the National University of San Luis Gonzaga of Ica with provisional
protection.

Reference: OFFICE No. 002473-2024-DDC ICA/MC (October 31,
2024) OFFICE No. 002344-2024-DDC ICA/MC (October 12,
2024) OFFICE No. 002068-2024-DDC ICA/MC

Through this present, I address you with cordial greetings and reiterate our request, since we
have been requesting, through the referenced documents, information regarding the medical report of
the X-ray and CT examinations performed on the two (02) mummies named "María and
Wawito" on September 13 of this year, without any response.

Our request is supported because the senior management of our Headquarters, as well as other private
institutions, have been consecutively requesting that we provide information in this regard.

Thanking you for your attention to this matter and the institutional support for the service provided,
I bid you farewell.

Sincerely,

MULTI-SLICE SPIRAL TOMOGRAPHY

TOTAL BODY

SPECIMEN 1:

MARIA

DATE:

11/07/2024

Imaging examination by multi-slice spiral tomography modality performed with a PHILIPS INGENUITY 64-channel device acquired in 64-row spiral modality, axial volumetric acquisition, with post-processing of axial, coronal, sagittal, and curved multiplanar reconstructions (MPR); three-dimensional (3D) reconstructions Volume Rendering (VR)

ACQUISITION FACTORS

IP: 452
kV: 120 mAs: 27 COLLIMATION: 64 X 0.625
DISPLACEMENT 1.470 ROTATION TIME 0.75

ACQUISITION DATE 09/13/2024 TIME 11:21

- Body in fetal position
- Cranial structures show a normal morphological skullcap
- Brain parenchyma at the anterior level partially visualized in a small amount of hyperdense appearance, without defining the usual structure
- Basal thorax structures visualized with decreased pulmonary structures and cardiac structures with integumentary structures that define cardiac spaces and large vessels with the usual structure
- Liver: with visible ligamentous structures, not defining the hepatic parenchyma
- Stomach: not defined
- Pancreas: not defined
- Spleen: with visible ligamentous structures, not defining the parenchyma
- Adrenal glands: glandular structures not differentiated
- Kidneys: renal structures are not differentiated
- No free fluid in the intraperitoneal cavity
- Retroperitoneum: presence of peritoneal fascia
- Abundant fecal remains in the colonic frame
- Pelvic cavity: No alterations are seen in the visualized structures and organs. No intrapelvic or inguinal lymphadenopathy is observed.
- The abdominal wall shows anatomical planes with little soft tissue.
- At the level of the upper limbs, bone structures of normal size, shape, and location are striking.
- At the level of the right hand, with two metacarpals and two phalanges.
- At the level of the left hand, with three metacarpals and two phalanges.
- At the level of the lower limbs, bone structures of normal size, shape, and location are striking.

Dr. Leonil Pickmann Flores,
Medical Radiology
Technologist

DR. ENRIQUE CARLOS CANDIA,
RADIOLOGIST
CMP 33067RNE-25139 "AUGUSTO
HERNANDEZ MENDATA" HOSPITAL, ICA
H&ESalud

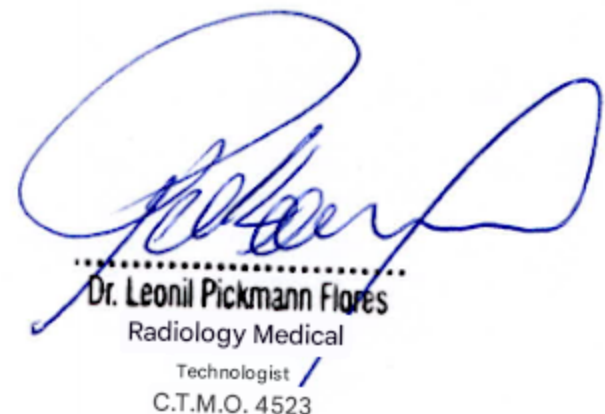

- the level of long bones, presence of multiple Harris lines
- At the level of the right foot with three metatarsals and three phalanges in the right foot
- At the level of the left foot with three metatarsals and presence of the first phalanx
- At the level of the cervical and dorsal spine, osteological lesion at the level of the posterior edge of D2, anterior displacement of D2 over D3, and at the level of D7 and D12
- Lumbar posterior osteolytic lesion of L1, presence of anterior osteophytes of L1, L2, L3 and L4, sacralization of L5
- Two sacral vertebrae
- Absence of coccygeal spine
- At the right sacroiliac level, a right calcified nodule with a density of 1237HU measuring 26x16mm is seen

CONCLUSION:

MORPHOTOMOGRAPH OF A HUMAN SPECIMEN WITH LITTLE SOFT TISSUE AND PARTIAL ABSENCE OF PHALANGES, WHERE THE FOLLOWING PATHOLOGICAL FINDINGS ARE IDENTIFIED:

1. MULTIPLE OSTEOLYTIC LESIONS IN THE SPINE
2. ANTEROLITHESIS OF D2 ON D3
3. OSTEOLYTIC LESION IN THE RIGHT SACROILIAC BONE
4. LACK OF PHALANGAL BONES AT THE LEVEL OF THE UPPER AND LOWER EXTREMITIES AND AT THE LEVEL OF THE SPINE
5. SACRALIZATION OF L5
6. HARRIS LINES IN THE LONG BONES OF THE LOWER EXTREMITIES
